FEBRUARY 3, 2012

TO: BOARD OF DIRECTORS

THROUGH: ARTHUR T. LEAHY *ATL*
CHIEF EXECUTIVE OFFICER

FROM: MARTHA WELBORNE, FAIA *CEA*
EXECUTIVE DIRECTOR, COUNTYWIDE PLANNING

SUBJECT: MEASURE R REGIONAL FUNDS "ALIGNMENT" MOTION
ADDITIONAL INFORMATION

ISSUE

At the January 18, 2012 Planning and Programming meeting, Directors Najarian, Dubois, O'Connor and Knabe agendized a motion to allow Measure R Highway "equity" (subregional) funds to be used as a source of local match for future Call for Projects applications. Questions arose as to the source of these funds, types of eligible projects, and a list of approved projects currently being funded. This Board Box provides the requested information.

DISCUSSION

The Measure R Highway Subfund approved by the Los Angeles County voters in 2008 included Highway Operational Improvement projects for the Arroyo Verdugo (\$170 million), and Las Virgenes/Malibu (\$175 million) Subregions as well as Ramp and Interchange Improvements for the I-405, I-110, I-105 and SR-91 in the South Bay (\$906 million), I-605 Corridor "Hot Spot" Interchanges (\$590 million), BNSF Grade Separations (\$35 million) and I-710 South and/or Early Action projects (\$590 million) in the Gateway Cities. To clarify the definition of Operational and Ramp/Interchange Improvements, we formed a Highway Advisory Committee. Representatives from each Council of Governments, City and County of Los Angeles and Caltrans composed the Committee which met six times. The work of the Committee was incorporated into the 2009 Long Range Transportation Plan approved by the Board in October 2009.

With regard to the definition clarification for Operational and Ramp/Interchange Improvements, the Committee requested as much flexibility as possible. Therefore, both Soundwalls (which are not eligible for the Call for Projects) and Bike Lanes are eligible for up to 20% of the funds in the Arroyo Verdugo, Las Virgenes/Malibu and South Bay subregions. Additionally, intersection and street widening projects on roadways generally within a one-mile corridor of a State

highway are also eligible. Other types of eligible projects include, but are not limited to park and ride facilities, turnouts, safety improvements (also not eligible for the Call for Projects) that reduce incident delay to name a few. Attachment A lists the types of Board approved eligible projects.

To receive Measure R Highway Operational Improvement funds, each subregion must submit an approved project list for a nexus analysis prior to Board consideration. The Board approved five-year implementation plans for the Arroyo Verdugo, Las Virgenes Malibu and South Bay Subregions. These approved project lists are included in Attachment B. To date, project lists have not been approved for the I-605 Corridor "Hot Spots" Interchanges, BNSF Grade Separations and I-710 South and/or Early Action projects in the Gateway Cities.

Call for Projects

Given that Measure R funds are a relatively new funding source, there has been no prior Board direction on the use of Measure R Highway sub-regional funds in the Call for Projects process. In the 2011 Call for Projects, we restricted these funds from being used as local match since subregional dollars were not available in all subregions. (Local match consists of a minimum required match and an optional "overmatch" that can be awarded up to 10 points based on a sliding scale).

As a policy decision, the Board has discretion to allow Measure R Highway sub-regional funds to be used as local match for the Call for Projects as long as the project being considered is 1) eligible for Measure R Highway sub-fund money; and 2) eligible to compete in one of the Call for Projects modal categories. It should be noted that Measure R Highway sub-regional funds are a different funding source than Measure R Local Return funds. Measure R Local Return funds are currently eligible as local match in the Call.

NEXT STEPS

Based on Board direction, we will incorporate changes to future Call for Projects applications and return to the Board in April for Board consideration of initiating the 2013 Call for Projects process.

ATTACHMENTS

- A. Project Eligibility for Highway Operational Improvement and Ramp/Interchange Improvements
- B. Approved Project List for Arroyo Verdugo, Las Virgenes/Malibu, and South Bay Subregions

(D-1)

Clarification on Project Eligibility for Highway Operational Improvement and Ramp/Interchange Improvements

The intent of a Measure R Highway Operational Improvement is to improve traffic flow in an existing State Highway corridor by reducing congestion and operational deficiencies at spot locations that do not **significantly** expand the design capacity of the system and are intended to address recurrent congestion. In addition to those eligible projects on the State Highway System, for Measure R, projects located on **primary roadways located generally within a one mile** corridor of any State Highway, **including principal arterials, minor arterials, and key collector roadways**, will be considered eligible for Operational Improvements and for ramp and interchange improvements. Examples of **eligible** improvement projects include:

- interchange modifications (but not to accommodate traffic volumes that are significantly larger than the existing facilities were designed for);
- ramp modifications (acceleration - deceleration/weaving);
- auxiliary lanes for merging or weaving between adjacent interchanges;
- curve corrections/improve alignment;
- signals and/or intersection improvements;
- two-way left-turn lanes;
- **intersection and street widening;**
- **traffic signal upgrade/ timing/synchronization;**
- **traffic surveillance;**
- channelization;
- **Park and Ride facilities;**
- turnouts;
- shoulder widening/**improvement;**
- **safety improvements that reduce incident delay.**

Up to 20% of the Arroyo Verdugo and Las Virgenes/Malibu Subregions' Operational Improvement dollars may be used for soundwalls and bike lanes.

Other projects could be considered on a case-by-case basis as long as a nexus to State Highway Operational Improvements can be shown.

*Bolted words reflect Committee's input
