**SUBJECT: PROGRAMWIDE
STATUS OF LIGHTING DESIGN CRITERIA, STANDARDS,
PLANS AND SPECIFICATIONS**

ISSUE

At the Construction Committee Meeting of September 14, 1995, Director Patsaouras inquired regarding the status of the incorporation of the EMC Lighting Sub-Consultant's recommendations into the MTA design Baseline.

BACKGROUND

1. Recommendations by Horton Lee, the lighting consultant on MTA Design Criteria and Standard Drawings, have been incorporated into the MTA Baseline, and the documents are now the new standards for all designs.
 - a) Twenty-five Standard Electrical drawings have been revised. Ten Standard Electrical drawings have been newly created.
 - b) Twenty new sketches have been added to the Baseline Design Criteria.
2. Metro Red Line Eastside Project: All new projects, including the Eastside Extension Project, will be designed to the new lighting criteria.
3. Metro Red Line Segment 3 Project: All stations, Hollywood/Highland Station-CO301, Universal City Station-CO321 and North Hollywood Station-CO351, are designed according to the lighting consultant's recommendations.

4. Metro Red Line Segment 2 Project: Segment 2 station designs were completed or in an advanced state of design well before the consultant's recommendations were developed and consequently the recommendations were not incorporated.
5. Metro Pasadena Blue Line Project: Presently, the final design completion of this project is on hold. Upon the restart of the design, the Pasadena Blue Line project will comply with the revised Design Criteria, which incorporates Horton Lee's recommendations.

If it is decided to procure the Pasadena Blue Line Project through a "design-build" contract, then compliance with the new design criteria will be mandated to the design/build team.
