#### NEW BUSINESS

Chairman Edelman asked staff to prepare a proposal for developing a business support group for the efforts of the Commission to improve transit in the county. There are many business people, commercial property owners and others in the business community who would like to be part of the development of rapid transit. Staff should develop a program to involve the business community to make them aware of our program and get a support network going. Staff will report back at the next Commission meeting.

Mr. Remy moved to send a letter to the California Transportation Commission expressing an intent that this Commission would also participate in the acquisition of Union Station. He would like this item referred to the appropriate committee for review. Funding will come from the Article XIX set-aside funds. Mr. Szabo seconded the motion. Motion was carried, hearing no objection.
