In so advising UMTA, the District stated further that under 'planned operating conditions and use' the buses will also conform to applicable federal, state, and local law, since the planned operating conditions and use of the bid buses will be controlled by the District's Transportation Department to assure that a lawful operation is secured and maintained after the buses are received. Additional flexibility in bus assignments under the planned operating conditions and use will be available if the state weight law is amended to increase the weight permitted on the rear axle, and, similarly, if the federal highway act is amended so greater flexibility in bus assignments will be available in the use of the Interstate System. In addition to the law changes as above described, necessary variances from the requirements can be requested from appropriate governmental agencies if deemed useful."
