Mr. Kenneth R. Moore, General Chairman of the United

) Transportation Union, who was present at the meeting, asked for permission to speak in regard to this subject. Report by Chairman of Public Information & Marketing Committee

Director Macke, Chairman of the Public Information & Marketing Committee, reported that the Committee met this morning and reviewed the Public Information Program for the first part of the year, and that it was felt that the efforts so far have been quite successful in maintaining ridership, and that for the first three and one-half months of the year, revenue and ridership were on the increase as opposed to the national trend.

President Krauch inquired as to whether the signs advertising the District for placement on the sides of the buses had been prepared in substitution of those presented to the Committee sometime ago, the content of which was not felt to be adequate.

Mr. Nelson reported that at the Committee meeting this morning Chairman Macke had requested that a meeting of the Public Information & Marketing Committee be called at which the Metromedia relationship and contract would be reviewed, which would involve the matter of the advertising signs.

President Krauch also inquired as to the results of the coupon insertion campaign in the metropolitan and community newspapers, and in the TV Guide.

Director of Public Relations Manning reported that the response had been very substantial and that the Department had received 9,000 responses to one insertion.

#### Report of General Manager

General Manager Nelson reported on the activities of the District since the Regular Meeting held May 12, 1970. A copy of the Report is attached to these Minutes as Exhibit 5.

#### Committee Meetings - Schedule of Meeting Times and Dates

At the suggestion of Director McMillan, the General Manager was directed to present to the Board for consideration a schedule of regular Committee meeting times and dates which would allow at least one hour for each Committee meeting.

Director Macke announced that he felt that the Staff should develop some testing procedures in connection with the delivery of petroleum products under contract in order to insure that the District requires any contractor to conform with the specifications established.

General Manager Nelson reported that instructions had been given the Staff, and procedures have been set up in order to make periodic checks to see that the successful bidder complies with the specifications, and that periodic reports will be made to the Board.

**I. Proposed Amendments.**

The District has approximately 400 employees whose positions are not included within the provisions of the District's three collective bargaining agreements with the United Transportation Union, the Amalgamated Transit Union, and the Brotherhood of Railway Clerks. These 400 employees consist basically of supervisory and management employees. A separate retirement income plan has been and is maintained to cover these employees.

The present plan is organized in two parts, one called the Basic Plan with present limits of \$100.00 a month, and a Supplemental Plan providing benefits including the basic benefits based fundamentally upon a standard of  $1\frac{1}{4}\%$  of monthly income times the number of years of service. The plans are not considered adequately responsive to the District's present needs.

Recently negotiated amendments, effective June 1, 1969, June 1, 1970 and September 1, 1971, to the three Union retirement income plans, established under the collective bargaining contracts, evidence a need to improve and clarify the provisions of the non-contract plan. In addition, certain technical changes are required, including the need to permit an election to a very limited number of employees to either come under the new plan or to permanently remain under their present plan.
